- Range of tyres, rims & hubs available.
- Extension arms give a staggered layout for narrow row spacing's.
- A wide variety of wheels/rims/axles are available Moose Industries Mounting Arms (See Brochure for details).

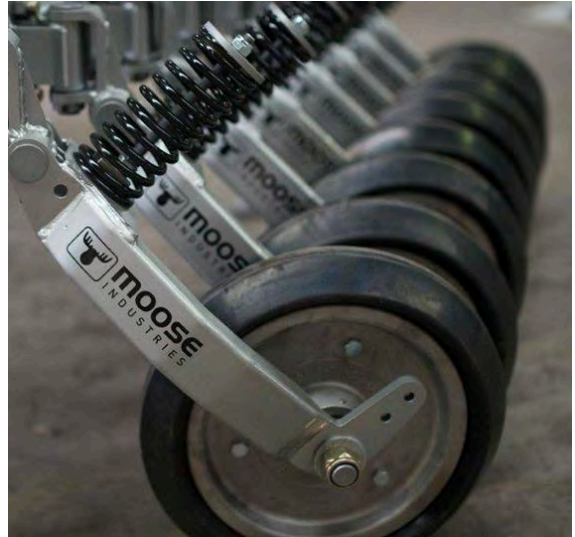

Robust agricultural innovations

CUSTOMER FEEDBACK

"We most recently partnered with Moose Industries for their unique ability to supply purpose designed, quality press-wheels to equip specialised plot seeders co-manufactured in Adelaide, which were exported during 2014 to the Middle East under our DEFAT funded research and development project.

The company Moose Industries has an undeniable reputation in the Farming industry for inventive design and quality manufacturing. They are increasingly recognised as a significant regional manufacturer committed to the development of efficient machinery solutions for South Australian farmers and, increasingly, nationwide."

- Jack Desbiolles
UNI SA

MOOSE INDUSTRIES

Moose Industries business capabilities are strong in primary industries, predominantly the cereal cropping broad acre agricultural sector. For 18 years Moose Industries has serviced this sector, working closely with producers to design and develop innovative new ways to improve agricultural practices and streamline efficiencies.

Robust agricultural innovations

- Press wheels
- Single or double coulters
- Adjustable mounting arms
- DBS coulters adapter
- Tailgate chutes
- Hydraulic coulters
- Parallelogram seeding press wheels
- Oil filtration unit
- Stone bucket
- Light duty single press wheel
- Tandem press wheel
- Tree seeder
- PTO trailer
